

ABEC Push Poll Call
Monday, January 7, 2008
5:45pm
Approximately 6-7 minutes in length

Called at 702-562-8147 (NV Conservation League Office)

The poll's first couple of questions focused on energy independence and regulation slowing the market. I don't remember the exact questions, but here's a shot:

Q: Do you think that the increase in environmental protections have hampered or slowed America's move towards energy independence?

Q: What would you say is the number one way we can achieve energy independence?

Q: Which is a better way to meet our energy needs: coal, natural gas, or nuclear?

Q: Do you think nuclear energy is safe?

Q: Do you think that America can meet its energy needs by increasing our use of coal and expanding the use of nuclear?

There were other questions about being registered, education, income, etc....

When I told the woman (who had a VERY southern accent) that I couldn't support nuclear power because I lived in Nevada and opposed Yucca Mountain, she commented that "a lot of people had said the same thing." She did say it was a national poll when I asked her. She couldn't tell me where she got my info.
